**ENHANCE your Covid-Secure protection for up to 30 days  
with our Zoono® Fogging Service**

- Zoono® is an antiviral surface shielding disinfectant that sanitises all treated surface areas and touch-points quickly and effectively
- Our Fogging Machines cover all areas with Zoono® which is non-toxic and leaves no residue or taint
- Effective anywhere - offices, residential and community venues etc.
- Food-safe and harmless to electronics

**WE ALSO OFFER FULL VIRUS DECONTAMINATION**

If your workplace has been affected and you require immediate attention at short notice, let us know. We can offer a professional medical grade product that can disinfect and sterilise all areas treated - for peace of mind and any COSHH risk assessment.

## **BENEFITS FOR YOUR BUSINESS:**

- Helps prevent cross-contamination
- Gives confidence and reassurance to your customers
- Reduces risk of local lockdowns and staff absence
- Supports business Risk Assessment/COSHH requirements
- Local, flexible service with realistic pricing
- Stand out from your competitors with positive social media video promotion and window stickers
- Minimal disruption
- Used by companies such as TfL, Boeing and First Bus

**Email or call Sandra for more information**

### **Case Study**

*Transport for London (TfL) conducted their own tests over a 25-day period on two of their Underground carriages, one treated with Zoono®, the other with a normal anti-bacterial.*

*Both carriages were used on the underground network with thousands of passengers every day and the carriages went through their normal cleaning processes at the end of each day.*

*After 25 days the carriage treated with Zoono had 0% contamination, but the other had 62.5% contamination.*

Zoono has been tested to (EN standard 14476:2013+A2:2019 and the PAS 2424 and PAS 2430) to ensure full effectiveness.
